OFFERED FOR SALE BY

DANIELS BROS.,

Seed Growers and Merchants,

NORWICH.

THE ROYAL NORFOLK SEED ESTABLISHMENT, NORWICH.

TO OUR CUSTOMERS.

WE have much pleasure in handing you our Catalogue of Agricultural Seeds for the present season, and whilst thanking you for your very liberal and increased patronage of last year, beg respectfully to solicit a continuance of your obliging orders.

MANGOLDS.—In consequence of the very unfavourable harvest of 1892, we regret to say that really good English-grown stocks of Mangold Seeds of good growing quality are much scarcer than during last season, whilst prices are in some instances considerably advanced. We therefore beg to draw particular attention to our fine selected stocks of Gate Post, Champion Orange Globe, and Golden Tankard, which have given such high satisfaction during the past year, and of which we hold fine and thoroughly reliable stocks of Seed for disposal at a moderate price. Really good stock and growing quality being of the first importance, agriculturists should be on their guard against purchasing cheap French and German Seeds, which are of inferior stock and quality, and only lead to the most disappointing results.

SWEDISH AND OTHER TURNIPS.—Of these the Seed crop of last year was fairly good, and we again offer our splendid stocks of Norfolk Giant and Defiance Green-Top Swedes in fine sample and at moderate price; whilst amongst White Turnips, our Norfolk Green Round and Purple-Top Mammoth are recommended as the very best procurable.

CLOVERS AND GRASSES.—With the exception of White Clover, the Clover Seed crops of 1892 were decidedly below the average both in yield and quality, whilst the prices for good samples rule higher than during last Spring. We are, however, pleased to state that we have been able to secure some very fine samples considering the season, and which we can offer at very moderate prices. Of Rye Grasses, both English and Italian, we also hold some excellent samples, and for these and Clovers we shall be pleased to furnish samples and quotations on application.

PERMANENT PASTURE GRASSES.—We have long been famous for our very excellent mixtures of Permanent Pasture Grasses, which are carefully made up according to soil, and which always give the highest satisfaction. Our fine mixtures of Grass Seeds for Bowling Greens, Lawns, and Tennis Grounds, are also in great repute, and can be highly recommended.

DANIELS BROS.

1st March, 1893.

MANGOLD.

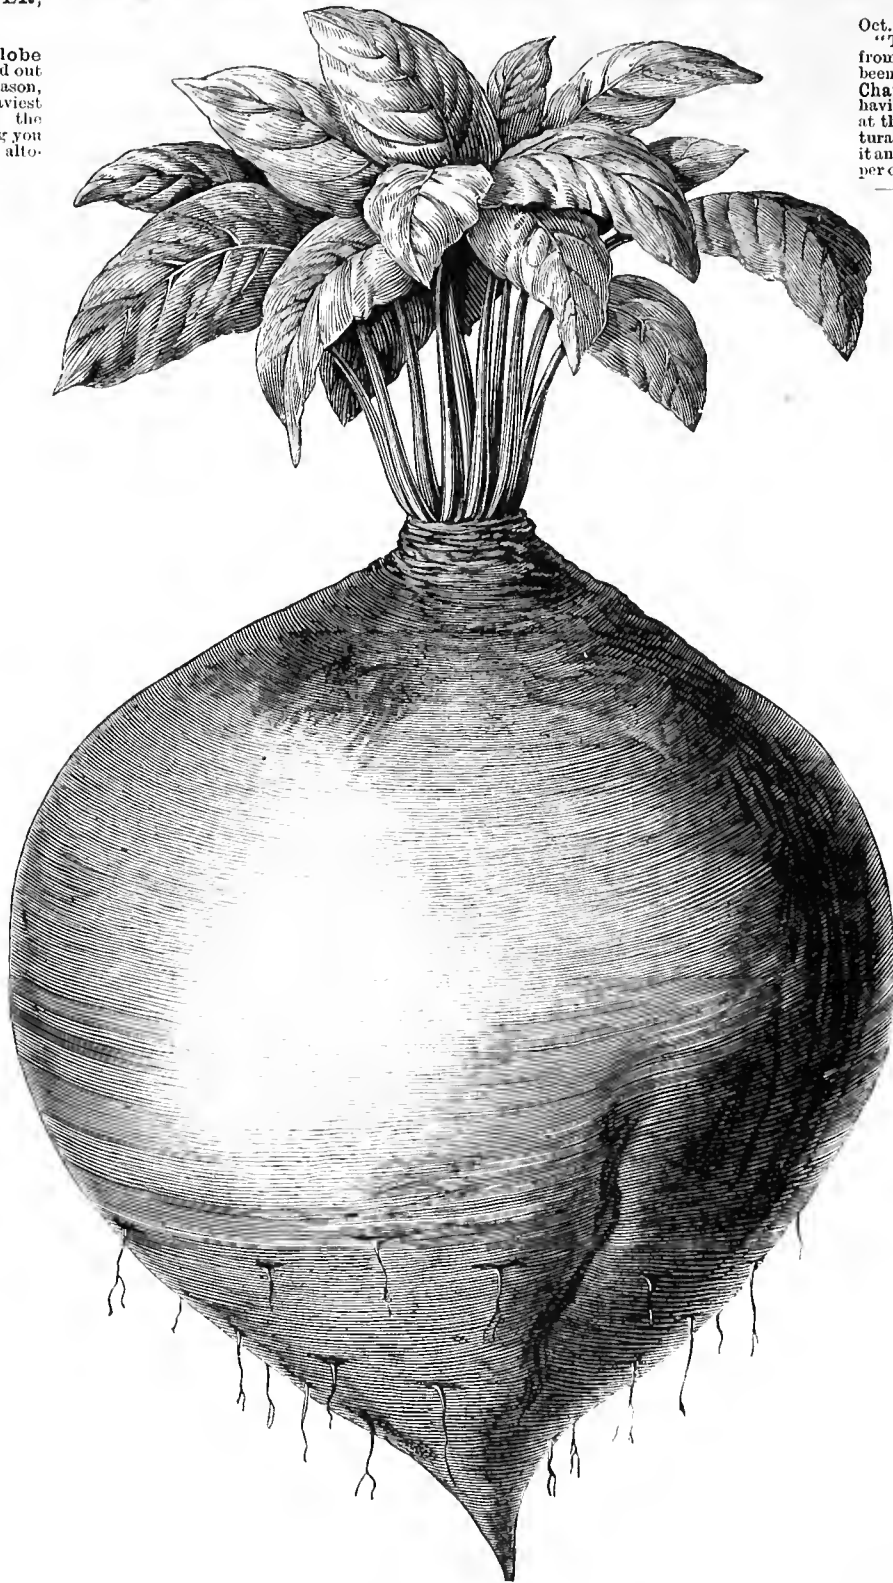

From **Mr. C. POTTER**,
Quebec Farm,
East Dereham.

"Your **Orange Globe Mangold** have turned out remarkably well this season, and I have now the heaviest crop of Mangold in the district. I am sending you six roots, weighing altogether 1 cwt.

From **Mr. G. COSSER**,
Shaftesbury,
Oct. 25th.

"The **Mangold Seed** I had from you last Spring has been quite a success, the **Champion Orange Globe** having received first honours at the Shaftesbury Agricultural Society's Show. I find it an exceedingly heavy cropper of first-class quality."

Extract from "NORFOLK NEWS."

ROOT SHOWS IN NORWICH.

"It is the custom of MESSRS. DANIELS BROS., the well-known Seed Growers of the Royal Nurseries, Norwich, to offer Prizes annually for specimens of Roots grown from Seeds supplied by them, and to hold an exhibition of those sent in for competition. The Show this year took place on Saturday in their spacious warehouses in Bedford Street, and there was a large attendance of visitors. The Roots were conveniently displayed on spacious tables in an upper chamber. The judges were Messrs. R. Wortley (Suffield) and W. Case (Tuttington). The Mangolds exhibited did not reach the size of some former years, but they were remarkable for their symmetry and solidity. They were small at the top and by no means coarso-rooted. There were a few monsters on show, some of them turning the scale at 20 lbs. The falling-off in size generally is attributed to the unseasonable weather in July, when there was so much rain, but everybody was agreeably surprised that the Roots they saw on Saturday had turned out so well. The atmospheric conditions which proved unfavourable to the Mangolds would seem to have been beneficial to the Swedes, for those exhibited were exceedingly fine—in fact, it is doubtful whether better have ever been seen. Turnips were good, and Mr. Learner's and Mr. B. Stimpson's lots deserve special mention. There were some gigantic Cabbages shown, and a close competition took place between Mr. Colman, M.P., and Mr. B. Stimpson in this class. The hon. Member's biggest specimen weighed 56½ lbs., while Mr. Stimpson's missed this scaling by a couple of pounds. Mr. Stimpson's was, however, of a much more solid nature, and therefore obtained chief prize. The high quality of the Show speaks well for the excellence of the Seeds grown and supplied by MESSRS. DANIELS. The Prize List is annexed:—

Six Roots of Daniels' Norfolk Purple-top Swede—1, Mr. H. Leeder, Berghapton, weight 83½ lbs.; 2, Mr. R. F. Yallop, Brooke, 72 lbs.; 3, Mr. H. Yellop, Sprowston, 72 lbs.

Six Roots of Daniels' Defiance Green-top Swede—1, Mr. J. Christie, Framingham, 80 lbs.; 2, Mr. J. L. King, Swardeston, 75½ lbs.; 3, Mr. D. Harrison, Aele, 64½ lbs.

Six Roots of Daniels' Improved Purple-top Swede—1, Mr. J. L. King, Swardeston, 98½ lbs.; 2, Mr. R. F. Yallop, Brooke, 87½ lbs.; 3, Mr. H. Leeder, Berghapton, 82½ lbs.

Six Roots of Daniels' Golden Gate-post or Daniels' Golden Tankard Mangold—1, Mr. J. J. Colman, M.P., Carrow, 86½ lbs.; 2, Mr. Bothway, Ashwellthorpe, 80 lbs.; 3, Mr. R. F. Yallop, Brooke, 68 lbs.

Six Roots of Daniels' Orange Globe Mangold—1, Mr. C. Potter, East Dereham, 111½ lbs.; Mr. J. J. Colman, M.P., Carrow, 89½ lbs.; 3, Mr. H. Leeder, Berghapton, 85½ lbs.

Twelve Roots of Daniels' Green Round or White Turnip—1, Mr. W. E. Learner, Dilham, 141½ lbs.; 2, Mr. B. Stimpson, Alderford, 129 lbs.; 3, Mr. W. Charlish, Long Stratton, 123½ lbs.

Three Field Cabbages—1, Mr. B. Stimpson, Alderford, 54½ lbs.; 2, Mr. J. J. Colman, M.P., Carrow, 56½ lbs."

DANIELS'

SELECTED MANGOLDS.

We have as usual given special care and attention to the selecting and improving of our choice stocks of **Orange Globe, Gate-Post, Golden Tankard, and Mammoth Long Red Mangolds**, which for size, quality, and smallness of top are considered the four finest varieties grown. Stocks of the other well-known sorts have also been grown under our supervision expressly for our retail trade, and may be relied upon as being true to name, of the best quality, and saved from selected roots.

GLOBE VARIETIES.

DANIELS' CHAMPION ORANGE GLOBE—

(See illustration). Our own unequalled stock, highly recommended for its neat top, fine clear skin, and tap-root, a prodigious cropper, and of splendid quality

EVIDENCE OF QUALITY.

From
Mr. SIMMONS,
Carrow Dairy Farm,
Norwich.

"I have grown your **Gate-Poet Intermediate Mangold** for several years, and am quite satisfied with them. They gained the First Prize at the Norfolk and Norwich Cattle Show in a large competition. They are the best quality **Mangold** I ever grew, and the stock do well on them."

From
Mr. S. ANDREWS,
Shadingfield.

"Your **Gate-Poet Mangold** were again very good, and I shall give you another order this Spring."

From
Mr. R. HARNAMAN,
Wrafton.

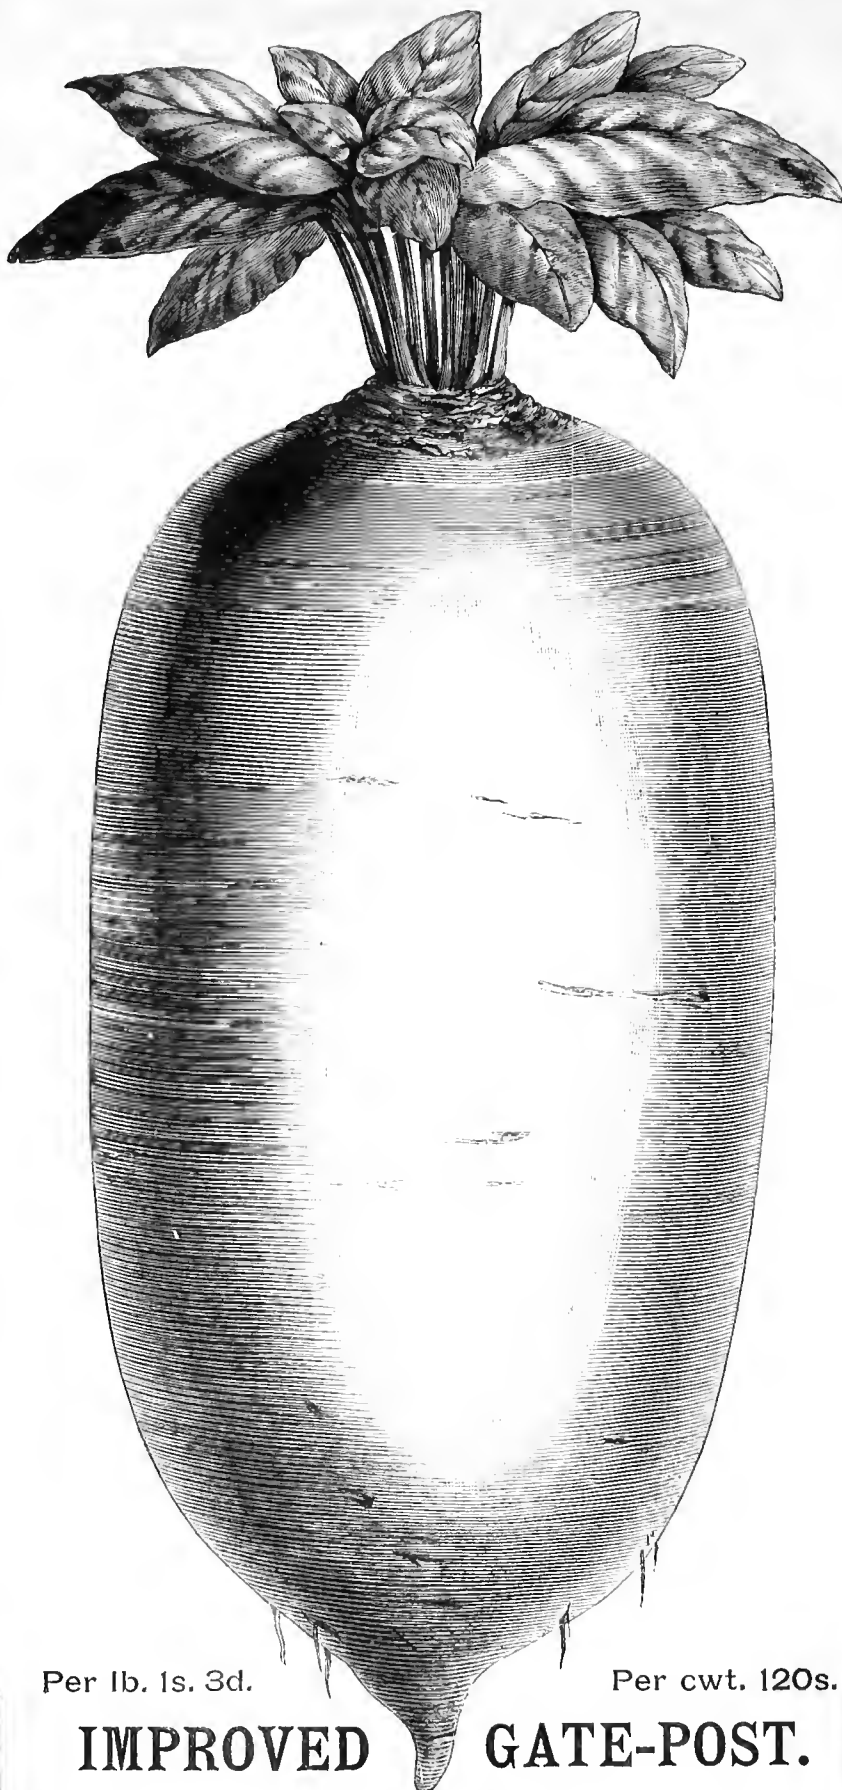

"Your **Mangold Seed Intermediate Gate-Poet**, and selected **Red Globe** have turned out splendidly."

From
Mr. J. BARKER,
Ringmer.

"I am very pleased to say the **Gate-Poet Mangold Seed** you sent me has produced a very good root; they are the largest in the whole neighbourhood."

From
Mr. J. SANDS,
Bailiff to
J. Christie, Esq.,
Framingham.

"I always feel a great deal of pride in showing your **Gate-Poet Mangolds** to all who pay us a visit that are at all interested in field Roots. For cleanliness, smallness of top, and weight per acre, they are not to be beaten by any other stock in cultivation. It is, in my opinion, needless to grow any other variety, as in your **Gate-Poet** all necessary qualities are combined."

Per lb. 1s. 3d.

Per cwt. 120s.

IMPROVED GATE-POST.

EVIDENCE OF QUALITY.

From
Mr. S. LEEDS,
Whitwell.

"I can confidently recommend your stock of **Gate-Poet Mangold** to all farmers who appreciate weight and quality. I have grown it now for some years, and have always found it in every way consistent."

From
Mr. W. REDGEMENT,
Blofield.

"I have for several years past grown your **Gate-Poet Mangold**, and can find no other variety to equal it both for quality and weight."

From
Mr. C. WATTS,
Cove.

"I had a splendid crop of your **Gate-Poet Mangold** last year, amounting to 45 tons to the acre."

From
J. GRICE, Esq.
Kiskin.

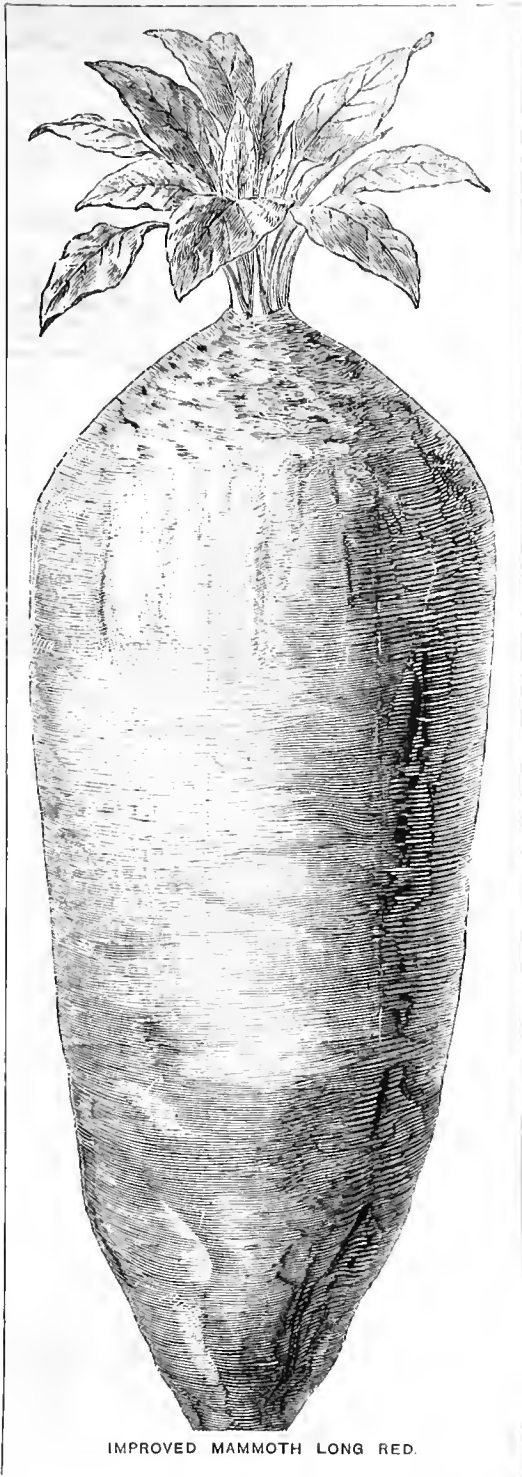

"I may say the **Intermediate Gate-Poet Mangold** I had from you last year were a splendid crop. The **Norfolk Giant Swede** were extra heavy, and kept well. The **Defiance Green-top** were a beautiful crop, and keeping very sound at present. All the **Seeda** came remarkably well, and were strong vigorous plants."

From
Mr. GROVE,
Costessy.

"Your **Orange Globe Mangold** and **Norfolk Giant Purple-top Swede** were a magnificent crop, and the quality superb."

DANIELS' SELECTED MANGOLDS.

LONG VARIETIES.

IMPROVED MAMMOTH LONG RED.

DANIELS' IMPROVED GATE-POST INTER-MEDIATE—

This is one of the finest Mangolds ever introduced, giving great satisfaction wherever it goes. The crop is generally uniform, and the roots heavy, handsome, and clean, with single tap-root, and of the richest and most nutritious quality. Most highly recommended for graziers

per lb.		per cwt.	
s.	d.	s.	d.
1	3	120	0

DANIELS' GOLDEN TANKARD—

A very superior variety for shallow soils, highly nutritious and stores well. This stock is specially selected for its yellow or golden flesh, its richness in saccharine matter, and handsome shape, having but a small top and a single tap-root

0	10	90	0
---	----	----	---

DANIELS' GOLDEN GATE-POST (new)—

In form and size it closely resembles the Mammoth Long Red, but the colour and quality of the flesh are equal to the Golden Tankard, being of a rich yellow and full of saccharine matter

0	9	80	0
---	---	----	---

Yellow Intermediate—

A good selected stock, giving great weight per acre; keeps well

0	10	90	0
---	----	----	---

Long Orange—

Selected stock, good quality, very nutritious

0	9	80	0
---	---	----	---

IMPROVED MAMMOTH LONG RED—

The heaviest cropping variety in cultivation; upwards of ninety tons per acre have been grown of this. Our stock is very fine, and can be highly recommended, having been selected by us for several years

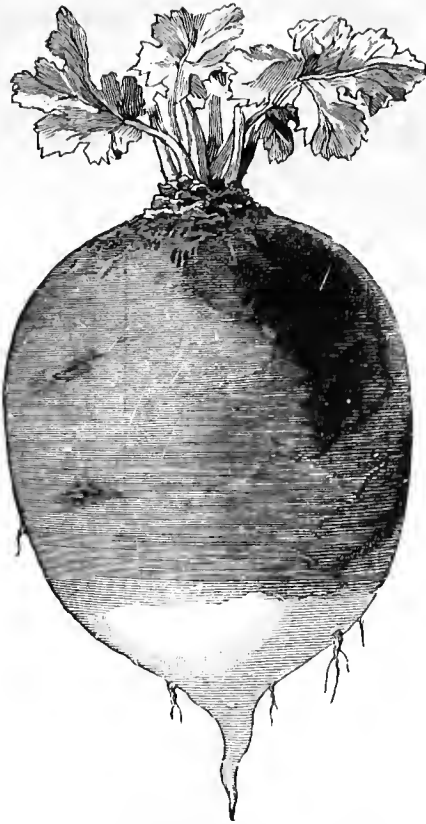

0	9	80	0
---	---	----	---

DANIELS' SELECTED LONG YELLOW—

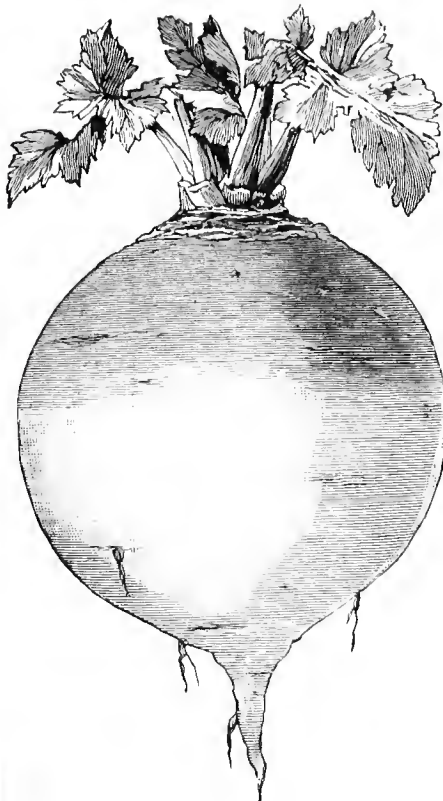

First-class, very nutritious. This we can highly recommend as a select stock of Long Yellow, single tap-root, easy to pull, and a heavy cropper

0	9	80	0
---	---	----	---

PRICES SUBJECT TO MARKET VARIATIONS.

NORFOLK GIANT PURPLE-TOP.

HARDY BRONZE-TOP.

DANIELS' SELECTED TURNIP SEEDS.

These have again been specially grown, the roots carefully selected and transplanted, so as to produce seeds of the finest quality. The crops hitherto have been noted for smallness of top, large and finely-shaped roots, being solid, and producing a heavy weight per acre, and are in every respect equal to the many high-priced varieties now before the public.

EVIDENCE OF QUALITY.

From Mr. LEGRICE, Great Melton.

"Last year I had about eighteen acres of your **Norfolk Giant Purple-top Swede**, and they realised a crop of **25 to 30 tons** per acre, of first-class quality. I have never seen a crop anywhere to approach it."

SWEDES.

	per pint.		per bush.	
	s.	d.	s.	d.
DANIELS' NORFOLK GIANT PURPLE-TOP. The grandest Swede ever introduced; symmetrical in shape, uniform in size, a grand cropper, and of splendid keeping properties	0	9	35	0
Purple-Top. A good selected stock	0	7	28	0
DANIELS' IMPROVED PURPLE-TOP (see illustration, page 6). A carefully selected and splendid variety; remarkably heavy cropper of unsurpassable quality. Is exceedingly hardy and stores well. Highly recommended	0	9	35	0
DANIELS' DEFIANCE GREEN-TOP (see illustration, page 7). This variety has withstood the severest Winters when other kinds have failed. A first-class sort for grazing purposes, keeping solid and nutritious far into the Spring, highly recommended	0	9	35	0
Bangholm Purple-Top. A superior Swede, fine shape and quality, a heavy cropper and excellent keeper	0	7	32	0
Champion Improved. A fine hardy Swede, one of the heaviest-cropping in cultivation, but not suitable to very poor or light soils	0	8	32	0
Skirving's Purple-Top. An old esteemed large-growing variety, suitable for strong stiff soils	0	7	28	0
Bronze-Top. Good cropper, hardy, and of splendid quality	0	8	32	0

EVIDENCE OF QUALITY.

From **Mr. YELLOP**, Sprowston.

"Your **Improved Purple-top Swede** are the finest I ever grew. The roots are large, handsome, and sound as a bell, many weighing 16 to 18 lbs. each, and they produce more weight per acre than any Swede I know of. I have gained First Prize for them several years in succession."

THE HARDIEST SWEDE IN CULTIVATION.

From Mr. SANDS, Bailiff to J. Christie, Esq., Framingham.
 "Your Defiance Green-top Swede were a splendid crop, very even, of first-class quality, and keep better than any Swede I know of."

"I have the greatest pleasure in testifying to the superior quality of your Defiance Green-top Swede in regard to its durability and feeding qualities. I have been a grazer for many years, but never had anything to equal them for feeding purposes, especially after a severe winter such as we have had. The Green-top Swede has sustained a larger number of beasts, in perfect health, and has fattened them much quicker than any other sort."

From Mr. E. S. POWELL, Stratton Strawless.

2.—Mixture for Permanent Pasture or Meadow.			
This comprises a selection of the finest Perennial Clovers, Cocksfoot, Crested Dogstail, Fescues, Golden Oat Grass, Meadow Foxtail, Parsley, Poas, Rye Grasses, Sweet Vernal, Timothy, &c.			
		25s., 30s., to	35 0

SPECIAL MIXTURES ARE MADE UP SUITABLE FOR ANY SOIL.

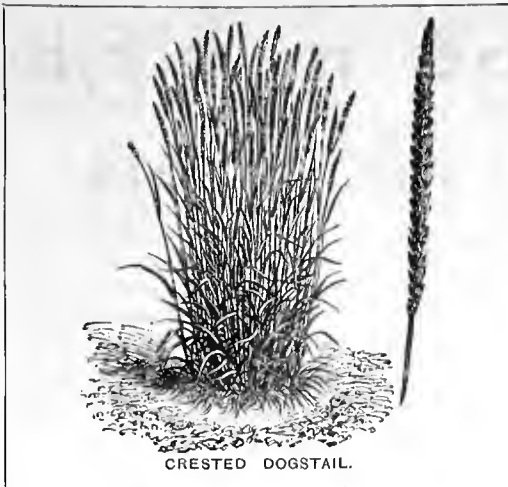

CUSTOMERS' OWN PRESCRIPTIONS MADE UP IF REQUIRED.

All Orders should be accompanied with a description of the land to be laid down and the measurement in statute acres.

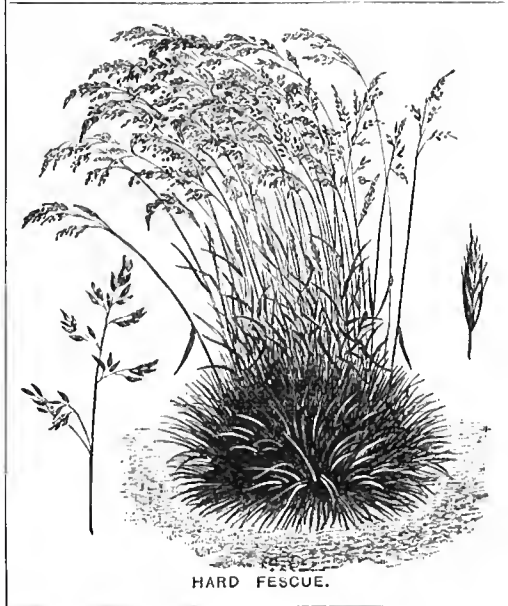

NATURAL GRASS SEEDS

USED IN

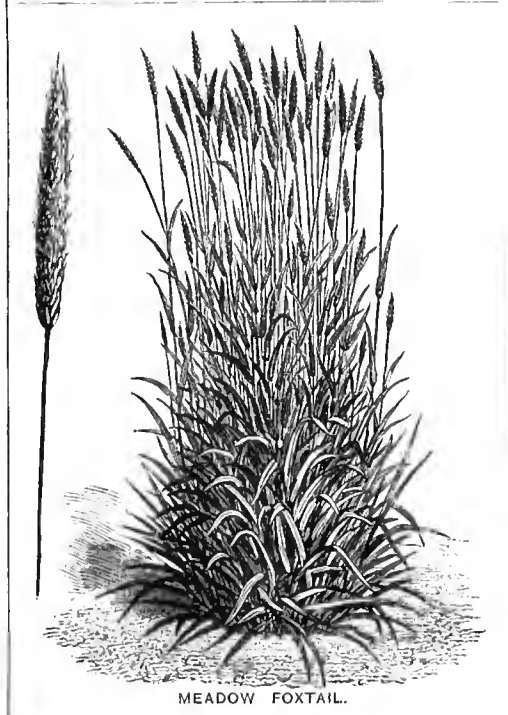

DANIELS BROS.' MIXTURES.

CRESTED DOGSTAIL.

HARD FESCUE.

MEADOW FOXTAIL.

- | | |
|---|----------------------|
| Meadow Foxtail (<i>Alopecurus pratensis</i>). One of the best known varieties of our Meadow Grasses, may be found growing naturally in most of our old pastures; it is one of the earliest-flowering and quick growing varieties, producing an abundant crop after being eaten down by cattle, one of the best for Permanent Pasture Mixtures 10d. to | per lb.—s. d.
1 2 |
| Sweet Vernal (<i>Anthoxanthum odoratum</i>). Grows naturally on dry pastures, comes early into use, is well known as producing the fine fragrance to be found in newly mown meadow hay, and is highly esteemed for sheep pasture; on lands which abound with this variety mutton of the finest quality is produced. 2s. 6d. to | 3 0 |
| Tall Oat (<i>Arrhenatherum avenaceum</i>). Yields a large quantity of early foliage, and grows rapidly after being cropped; is best adapted for sowing in coverts, and lands for game 1s. and | 1 3 |
| Golden Oat (<i>Avena flavescens</i>). May be found growing in dry light lands, where it yields a considerable amount of fine herbage of highly nutritious quality; being much liked by sheep it forms one of the best grasses for upland sheep walks 2s. to | 3 6 |
| Crested Dogtail (<i>Cynosurus cristatus</i>). One of the finest foliaged, dwarf, and compact-growing varieties of our natural grasses, adapting itself to almost every variety of soil and situation, producing a close, springy turf; is largely used in all mixtures for lawns, croquet, and cricket grounds 1s. 9d. and | 2 0 |
| Cocksfoot (<i>Dactylis glomerata</i>). This produces a large quantity of bulky foliage, of which sheep are remarkably fond, but it requires to be grazed early in Spring, being coarse and tufty when allowed to seed 9d. to | 1 0 |
| Hard Fescue (<i>Festuca duriuscula</i>). One of the best known varieties; the foliage is very fine, retaining a deep green colour during the Winter months; it is specially adapted for sowing in parks and pleasure grounds, and is much relished by sheep; it is also highly suitable for lawns | 0 7 |

All sorts much cheaper by the cwt.

From Mr. P. DONOHOE, Killanooly.

Apl. 27th.
"The meadow I have now growing from your Clovers and Grasses of last year is excellent, there is nothing like it for miles round."

The great advantage to Agriculturists of procuring well-dressed Seeds of first-class germinating power and free from all noxious weeds cannot be over-estimated.

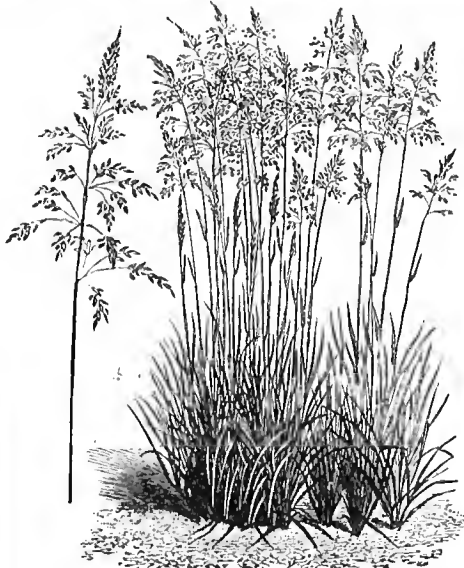

PRICES SUBJECT TO MARKET VARIATIONS.

NATURAL GRASS SEEDS

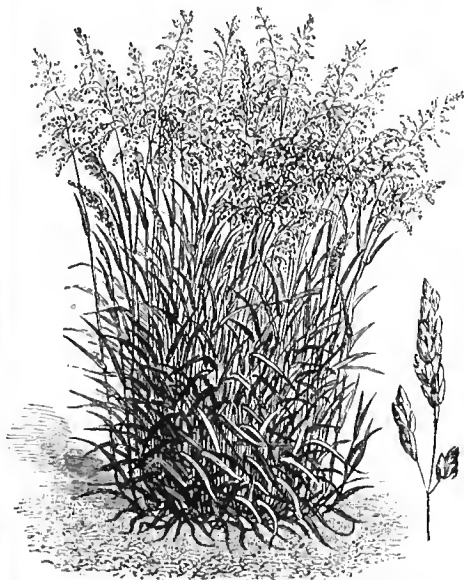

USED IN DANIELS BROS.' MIXTURES.

WOOD MEADOW GRASS.

SMOOTH-STALKED MEADOW GRASS.

ROUGH-STALKED MEADOW GRASS.

	per lb.—s.	d.
Tall Meadow Fescue (<i>Festuca elatior</i>). Grows abundantly on damp, retentive soils, in shady places, and may be found near the sea coast and inland river banks; although a comparatively coarse-growing grass, it is much relished by cattle, and is valuable for hay or permanent pasturo	1	0
Sheep's Fescue (<i>Festuca ovina</i>). May be found on high mountainous lands; well adapted for sheep pasture, and adds considerably to the superiority of the flesh and fineness of the wool. First quality	1	0
Meadow Fescue Grass (<i>Festuca pratensis</i>). One of the best varieties for alternate husbandry or permanent pasturo; superior to the Common Rye Grass, and produces an abundant herbage of which cattle are particularly fond; it also adds considerably to the bulk of the hay crop	1	0
Timothy Grass (<i>Phleum pratense</i>). One of the best for growing on strong soils and reclaimed moorlands	0	6
Rib Grass (<i>Piantago lanceolata</i>). Valuable for poor lands and sheep pastures	0	5
Wood Meadow Grass (<i>Poa nemoralis</i>). This produces a fine, close turf, and grows abundantly in shady places and under trees; it also does well in exposed places, is valuable for permanent pastures and lawn mixtures	2	0
Smooth-stalked Meadow Grass (<i>Poa pratensis</i>). Comes very early into use, and is found on very dry soils; when grown for hay, it should be cut when in flower	1	6
Rough-stalked Meadow Grass (<i>Poa trivialis</i>). Is recommended for sowing on wet soils and lands partially shaded by trees, and is suitable for sowing on sewage farms; it retains its dark green colour during the winter months	1	6
Yorkshire Fog (<i>Holcus lanatus</i>). Grows naturally on inferior light soils, particularly such as are partly composed of peat and are of a damp nature; it yields a large bulk of aftermath	1	0
Water Meadow Grass (<i>Poa aquatica</i>). Very common on the Fens of Cambridgeshire and Lincolnshire, where it affords rich pasturage in Summer, and forms the chief Winter fodder	1	3

All sorts much cheaper by the cwt.

Special Quotations for Large Quantities.

From G. BAGNALL, Esq., Gorgate Hall.

March 26th.

"Please send me 16 acres Grasses and Clovers same as last year, my layers look better this year than ever they have done before."

DANIELS BROS.' Grass Mixtures are made up with great care, from finest samples suitable for all soils and situations at moderate prices, and are sure to give satisfaction.

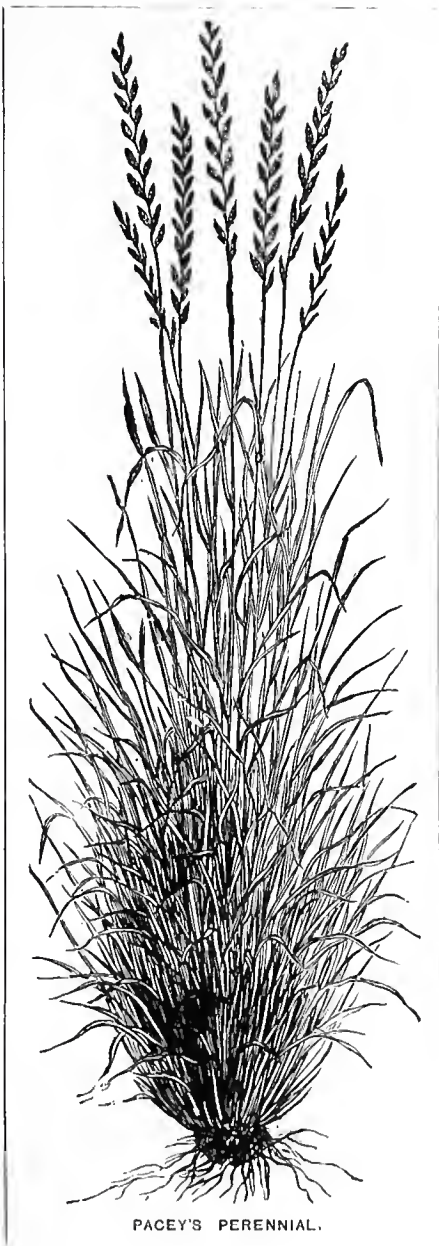

PRICES SUBJECT TO MARKET VARIATIONS.

DANIELS' SUPERFINE ITALIAN RYE GRASSES,

EXTRA CLEANED BY THE BEST MACHINERY.

Sow for a Crop, from three to four Bushels per Acre.
For Sowing with Clovers for "layers," from one to two Pecks per acre is sufficient.

PACEY'S PERENNIAL.

Daniels' Finest Imported Italian. This well-known variety arrives sooner at maturity, and produces a greater abundance of light green-coloured foliage than the Common Perennial Rye Grass; from its quick habit of growth it is specially adapted for lands irrigated with sewage, producing crops which may be cut a number of times in one season. Thoroughly cleaned by the best modern machinery ... 7 6

Italian, English Grown	4s. 6d. to	5 6
Italian, <i>Fresh</i> Imported	6s. to	7 6

Italian, as Imported in Bales, about 2 cwt. Lowest price per Bale on application.

PERENNIAL RYE GRASSES.

Perennial, Pacey's (first quality). The best for permanent pasture, being of the true perennial character; is also well adapted for Pleasure Grounds and Park Mixtures ... 5s. 6d. to 6 6

Perennial, Pacey's (good quality) ... 5 6

Perennial, Evergreen. Suitable to almost every variety of soil, and grows naturally in meadows and old pastures; one of our most valuable grasses for alternate husbandry, and is largely used in Permanent Pasture Mixtures. Finest quality ... 6s. to 7 0

Perennial, Scotch saved Seed ... 5s. 6d. to 6 6

Perennial, Common (for alternate husbandry). This variety produces a bulky crop the first season, and is more suitable for one-year crops of hay, or one year's lay 5s. 6d. to 6 6

Special low quotations for large quantities.

PRICES SUBJECT TO MARKET VARIATIONS.

CLOVER SEEDS.

EXTRA MACHINE CLEANED.

Alsike or Hybrid (*Trifolium hybridum*). In habit of growth not so upright as the Common Red Clover; thrives well on soils termed *clover-sick*, is exceedingly hardy, producing a large quantity of excellent foliage.

Choice English saved, per lb. 1s. to 1s. 3d; per bush. 60s. to 75s.

Giant Cow Grass or Perennial Red (*T. perenne*).

The flowers, foliage, and stems of this variety will be found darker in colour, with narrower leaves, and is much more permanent than the Common Red Clover; very highly esteemed for permanent pasture mixtures.

Choicest English, per lb. 1s. to 1s. 6d. ; per bush. 60s. to 75s.

Red or Broad-leaved (*T. pratense*). Our choicest English samples produce plants of a strong, luxuriant habit of growth, which adds considerably to the quality and bulk of the crop.

Choice English, per lb. 1s. to 1s. 3d. ; per bush. 60s. to 75s.

Foreign Seed, per lb. 9d. to 1s. ; per bush. 55s. to 65s.

White or Dutch (*T. repens*). One of the most valuable of our pasture grasses, being adapted to a great variety of soils, growing naturally in some of our oldest and finest meadows.

Choice English, per lb. 10d. to 1s. 3d. ; per bush. 50s. to 70s.

Trefoil or Black (*Medicago lupulina*). Grows naturally in dry pastures and cultivated lands, adding considerably to the bulk of the hay crop.

Choice English, per lb. 5d. to 7d. ; per bush. 25s. to 32s.

Yellow or Red Suckling (*T. minus vel. filiforme*). The produce of this variety being too small for pastures, it is exceedingly valuable for lawn mixtures, on dry soils, or where White Clover is liable to failure.

Choice Seed, per lb. 1s.

Clovers mixed for alternate husbandry. May be sown with a corn crop for mowing and grazing the following year.

Per lb. 10d. to 1s. ; per bush. 55s. to 65s.

Clovers mixed for Lawns. A choice selection of dwarf compact-growing sorts, adding considerably to the beauty and closeness of the turf.

Per lb. 1s. to 1s. 6d.

Crimson Clover (*Trifolium incarnatum*). Sown in August and September it will be fit for cutting by the beginning of June, when the land can be prepared and sown for another crop; it yields very abundantly and makes capital hay, which is much relished by all kinds of stock, especially horses.

Market price.

Perennial Clovers. A mixture of the most valuable varieties suitable for permanent pasture, especially adapted for sowing on lands where the Common Red Clover is known to fail.

Per lb. 1s. ; per bush. 65s. ; per cwt. 105s.

From Mr. REES THOMAS, Cwmearuhowell.

"It is due of me to let you know that I was extremely well satisfied with the Grasses and Clover obtained from you a year ago. The neighbouring Farmers and others greatly admired my crop. The plot I sowed was short of an acre, but still I realised in all, including first and second crop, £11 14s. from it. It will be a pleasure for me to recommend your firm."

Special low quotations are sent when large quantities are required. Samples on application.

YELLOW INTERMEDIATE.

FIELD CARROTS.

A field crop of Carrots grown on sandy, light, or medium soils, is a highly profitable one to the farmer. All kinds of stock eat them with great relish, and they are ever in demand as a marketable article. It is better to sow them in drills than broadcast, as they can be kept clean at less expense. 6 to 8 lbs. of seed should be sown per acre.

Altringham Improved. Very fine ...

DANIELS' LAWN GRASS MIXTURES FOR ALL SOILS.

EVIDENCE OF QUALITY.

From Mr. DRANE, Park Lane, Norwich.

"I cannot speak in terms too high of the quality of your Lawn Grass Mixture. In the space of six weeks your Seeds have produced a fine sward, with not a square inch of bare ground to be seen. This rapidity of growth and germinating power is unquestionably first-class. I shall certainly recommend your Lawn Mixture wherever I go."

CABBAGES FOR FIELD CULTURE

THE importance of the Cabbage as a field crop cannot be over estimated, and by an annually increasing demand we are glad to see that many farmers are beginning to recognise its great value. Few vegetables yield a greater crop than the Cabbage, and when the land is well farmed, fifty tons per acre is not an uncommon weight. It is absolutely invaluable as a winter green crop for ewes and lambs, and as an article of food for dairy cows, it is one of the finest milk-creating vegetables we have.

DANIELS' IMPROVED CHAMPION DRUMHEAD.

To obtain the greatest abundance of cattle food in the shortest time drill in 3 lbs. Garden Cabbage Seed per acre, March, April, May; thin out and cultivate as Turnips and Mangolds they come quick into use and so transplanting, will be fit for use August, September, and October and will prove very profitable crop to the grower.

No Farmer should be without a crop of Cabbages

Drill 4 lbs. per acre, or sow at the rate of 2 lbs. per acre for transplanting.

Package and Carriage Free. Thirty varieties for succession, including Peas and Beans.

No. 10. The Cottager's Packet, 2s. 9d. Post Free.

Containing sixteen varieties of choice Vegetable Seeds, including fair quantities of Peas, Onion, Radish, Lettuce, Carrot, Cabbage, &c. This is a very cheap collection which can be highly recommended.

N.B. These Collections are carefully made up from choicest sorts and stocks which have been specially grown for our Retail Trade, and as it is only by previous arrangement in this way that we are enabled to give so liberal a quantity and variety of Seeds for the sum charged, we wish it to be distinctly understood that, in supplying these Collections, we cannot allow any alteration or substitution of other sorts in place of the varieties named in our Catalogues.

PRESS REPORT.—NORFOLK AND NORWICH FAT CATTLE SHOW.

"MESSRS. DANIELS BROS.—The Royal Norfolk Seed Establishment, Norwich, have their usual display of Roots, &c., in the west gallery, and they have, if anything, surpassed their former efforts in making a grand display. The Roots this year are very fine, the Mangold exceptionally so, considering the season. One of the features of their Stand is a splendid lot of their celebrated Norfolk Giant Swedes very effectively arranged in the centre. This, we may add, is a speciality of the firm, and the Roots exhibited certainly carry out what they claim for it, viz., the heaviest cropping and best quality Swede in cultivation. Their Improved Purple Top Swede is well represented by some fine specimens, which are well worthy of notice. Of Mangolds we notice a grand lot of Champion Orange Globe, a very fine and hoavy cropping variety; the Roots are neat, well-shaped, and of extraordinary size, indeed, quality and quantity combined. Daniels' Gatepost or Intermediate Mangold are well to the front with some nice specimens. This celebrated stock has long been one of the standard varieties, to which the special attention of the firm has been directed, and is one of the finest stocks ever sent out. Daniels' Golden Gatepost, a fino variety, having the size of the above, while the flesh is of the same quality as the Golden Tankard, but producing nearly double the weight per acre more than that variety. There are also some very large specimens of Mammoth Long Red and Golden Tankard, both are clean with single tap roots. Daniels' Norfolk Green Round and Purple Top Mammoth are well represented by roots of excellent quality. Altogether the Roots are a grand collection, and do great credit to the excellent stocks of seed sent out by Daniels Bros. Facing the stand on the opposite side of the gallery, is exhibited the well-known collection of Potatoes, which is perhaps the finest in the world, containing all varieties most suitable to the farmer and gardener. Among them we notice Daniels' Special, a handsome white round potato, very heavy and of excellent quality. Another variety, Daniels' Duke of York, is a white kidney, now introduced for the first time. From its appearance and heavy cropping qualities we expect that before long it will be as well-known and appreciated as the White Elephant and The Daniels have been in the past, if not altogether to supersede those fine varieties. Some specimens are also shown of the Myrobella or Cherry Plum, a grand foning plant. It is of very quick growth, and will form a good stout fence in a very short time, and is well worthy of the attention of the farmer and landowner as a really effectual barrier to the intrusions of cattle. A fine collection of fruit, representing the most profitable sorts to grow, form a striking feature, and we understand that Messrs. Daniels Bros. have a grand lot of Trees, Bushes, &c., which may be seen at their Town Close Nurseries, and should advise all who have not done so to pay them a visit. The staircase is tastefully decorated with Dried Grasses, Palms, &c., the whole presenting a very effective and pleasing appearance."

TERMS OF BUSINESS.

Unknown persons sending an Order for the first time will please send CASH with the order, or furnish satisfactory references.

DISCOUNT FOR CASH.

Five per cent. is allowed discount for Cash paid within fourteen days from receipt of goods; all payments delayed beyond that time are not subject to this liberal discount.

CHEQUES AND P. O. ORDERS.

All Cheques should be made payable to DANIELS BROTHERS, and crossed GURNEY & Co., Norwich. Money Orders payable at Chief Office, Norwich.

COIN should not be sent by post, except in a REGISTERED LETTER.

QUALITY AND PRICE OF SEEDS.

Situated in the finest seed growing district in the world, and being large growers, we are in a position to give our customers all the advantages of superior stocks and quality at moderate prices (sometimes much below the London Wholesale Houses), consistent with high-class excellence. The germinating powers of all being tried before sending out, they may be relied upon as of first-class growing quality, entirely free from weeds and adulteration.

Our Prices are subject to Market variations.

SEEDS CARRIAGE FREE BY RAIL.

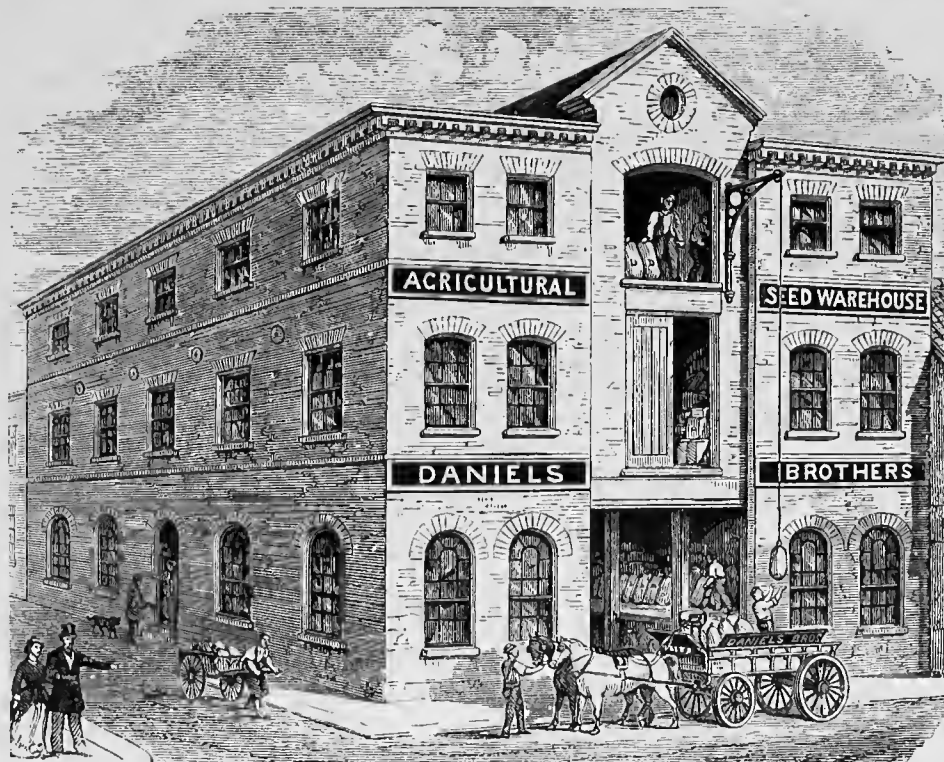

Orders of not less than 20s. value sent carriage paid to any railway station in England or Wales; £2 value and upwards free to any railway station in Scotland or shipping port in Ireland.

We take great care to supply none but genuine Seeds of the finest quality; we, however, wish it to be distinctly understood that we can only undertake to use our usual care and skill in this matter, and give no Warranty (express or implied) as to Description, Quality, Productiveness, or any other matter of any Seeds or Plants we send out; and will not be in any way responsible for the Crop, nor undertake any responsibility in case of disappointment.
